

Sali had a very special place in Maharishi's unbounded heart. She stood out among Maharishi's International group because of her profound clarity of mind, loving heart and enormous organising power. I was fortunate to work closely with Sali for many of my early years at International in the seventies and eighties and her guidance through those years has always remained with me - she set a high standard which I always try to live up to. Her approach to her work for Maharishi was so precise and focussed and she always seemed to understand exactly what he required in any particular project she was given. I admired the way she tackled every task he gave her, with completely focussed attention, and it was from Sali that I learned the importance of avoiding distractions along the way and just doing exactly what Maharishi wanted. I've often thought of Sali over the past many years although it was not possible to keep in close touch with her, but I have never forgotten those precious years of living and working so closely with her. I now feel that Sali is truly free to move ahead to a greater future. Nature has taken her on a long journey back to her Unbounded Self. Thank you Sali for being such a great light in Maharishi's family. Our love will always be with you.

Jai Guru Dev
